

FedLine Direct®

The FedLine Direct Solution, one of our convenient Internet Protocol (IP)-based options, delivers access to critical payment services and is designed especially for organizations that require a highly secure computer-to-computer interface to the Federal Reserve Banks.

The FedLine Direct Solution was designed especially for high-volume institutions and offers access to the services you use most, including:

- FedACH® Services
- Fedwire® Funds Service
- Fedwire Securities Service
- Fedwire Statements
- Accounting and Billing services
- Daylight Overdraft Reports

Key Features

Flexible Access Options

The FedLine Direct Solution is designed to meet a wide range of business needs and allow you to control user access and delivery of services based on several key factors:

- Number of users in your organization
- Transaction volume
- Desired access speeds
- Networking preferences
- Structure of your operations

Greater Control

The FedLine Direct Solution provides computer-to-computer interface, allowing you to fully automate your transaction and reporting processes from start to finish. This solution uses a direct connection to Federal Reserve Financial Services to give you greater control over your payment operations.

Trusted Security and Reliability

Like all FedLine® Solutions, security is a top priority for the FedLine Direct Solution. Our FedLine Solutions incorporate highly resilient, contemporary security features that are designed to create reliable protection for your business data, while providing flexibility to best meet your operational needs. Industry-standard, end-to end encryption is automatically enabled to help ensure the confidentiality and integrity of all communications with the Federal Reserve Banks.

Broad Network Reach

FedLine Solutions are your connection to a vast network of financial institutions and end-users. A direct connection to the Federal Reserve Banks via one of our FedLine Solutions can enable you to connect you with more than 110,000 Subscribers at nearly 10,000 organizations.

Easy Integration

The FedLine Direct Solution is designed to minimize the changes required to your financial services applications and to your organization's infrastructure. It utilizes a dedicated Wide Area Network (WAN) for transport and uses common, off-the-shelf software to support both file transfer and messaging services. This solution can be integrated with your existing technology platform to allow you to leverage technology investments and realize the efficiencies offered by fully-automated end-to-end processing.

Technical Requirements

Technical requirements for the Fedwire Funds and Fedwire Securities Services include:

- WebSphere® MQ software for the messaging component, FedLine Direct Message
- Connect:Direct® with Secure+ software for the file transfer component, FedLine Direct File

Robust Customer Support

Our dedicated team of technical analysts will work with your institution to explain technical requirements for the setup process and work with your technical staff throughout the implementation process. Once implementation is complete, you can still count on our technical support team to provide the assistance you expect from the Federal Reserve Banks.
